ISRAEL E. **CHINEDU**

PROFESSIONAL FULL STACK WEB DEVELOPER

Delta, Nigeria · +2348121821538

Chineduisraele@gmail.com · **LinkedIn Profile** · **GitHub** · **My portfolio**

Full stack web developer with two years experience in developing and deploying high performing, SEO-optimized and accessibility friendly React single page web applications powered by Django backends and PostgreSQL/MySQL database.

Experienced in utilizing responsive web design principles, implementing Django REST framework, server-side asynchronous task scheduling, API calls to third-party data provider and deploying, updating and maintaining React and Django projects on Netlify and Heroku.

SKILLS

- HTML
- CSS
- SASS
- JAVASCRIPT
- REACT
- REDUX
- PYTHON
- DJANGO
- MYSQL
- POSTGRESQL
- GIT
- GITHUB
- AWS
- HEROKU
- NETLIFY
- COMMAND LINE
- VSCODE

EXPERIENCE

APRIL, 2022 – PRESENT
FULL STACK WEB DEVEL0PER

Freelancer

JANUARY, 2022 – PRESENT
MARYLAND COMPUTER INSTITUTE, WARRI

React and Django part-time tutor

PROJECTS

DECEMBER, 2021 – APRIL 2022
FRIENDLEE E-COMMERCE PROJECT

Project URL: view project
Stack: **HTML, SASS, REACT, REDUX, DJANGO, CELERY, POSTGRESQL, AWS, NETLIFY, HEROKU, PAYSTACK**

- Responsive e-commerce single page web app with full functionality

- Utilized React redux for state handling and react image crop for client-side photo cropping, implemented image lazy loading using intersection observer api and client-side data caching

- Implemented multiple Django custom user model authentication and HTML email verification, asynchronous server tasks scheduling using celery, optimized database querying techniques and restful API data endpoints using rest framework

- Incorporated AWS S3 to upload images and persist image data to PostgreSQL database

- Integrated Paystack payment gateway for handling payments

FEBRUARY, 2022 – MARCH 2022

FASHIONISTA BLOG PROJECT

Project URL: [view project](#)
Stack: **HTML, SASS, REACT, DJANGO, POSTGRESQL, AWS, NETLIFY, HEROKU**

- Introduced website modernization efforts to create an overall better user experience, SEO-optimization and accessibility

- Implemented optimized database querying techniques to reduce server response time, restful API data endpoints using rest framework and HTML email notifications based on Django templating system

- Incorporated AWS S3 to upload images and persist image data to PostgreSQL database

MAY, 2022 – MAY 2022

VOOM COURIER SERVICE PROJECT

Project URL: [view project](#)
Stack: **HTML, SASS, REACT, NETLIFY, GEOAPIFY API**

- Simple React single page web application inspired by Fedex.com

- Incorporates Geoapify Api to track user location via IP address

CERTIFICATION

MAY, 2022 ● NO EXPIRATION DATE

GOOGLE AFRICA DEVELOPERS SCHOLARSHIP TRAINING PROGRAM 2021
